MISSION

Provide medical and educational missions/programs to the Philippines while creating awareness in local U.S. communities about our cultural diversity and the presence of Philippine-American communities.

VISION

Promote a network of community involvement to enhance the health status of Filipinos through medical missions and educational awareness.

VALUES

There is growth in sharing.

GOALS

Integrate the private sector with local healthcare providers, the health department, local administration, and concerned individuals to improve health and education in local communities in order to focus on vaccination programs and other identified health needs.

LET'S SHARE FOUNDATION, INC.

Founded in 2007 in Meadville, Pennsylvania

It has been rendering and coordinating medical missions in the Philippines that focus on vaccinations. (Tetanus, Measles, Mumps, Rubella and pneumococcal vaccines) We are also assisting communities with rabies educational campaigns and animal vaccinations.

Raising awareness for special children is also one of the educational activities of the foundation.

(Note: In September 2010, MMR vaccines were made available by DOH, Philippines)
